Multimedia kiosk

The multimedia kiosk is a fully customisable display and interaction solution, designed to house a touchscreen or PC across a wide range of professional settings. Its one-piece construction in 2 mm steel sheet delivers exceptional strength and long-lasting durability. Access to connections and internal components is made much easier thanks to a fully removable rear panel, while cables are routed neatly inside for a clean, secure finish. Fully configurable, the colour can be specified when ordering to match your brand guidelines perfectly.

Dimensions (in mm):
W 460 x D 500 x H 1530

DESCRIPTION:

- Material: 2 mm steel sheet.
- Screen mounting: Compatible with VESA 75/100 standards or via direct screen recess mounting.
- Security: A dedicated compartment is provided to house a PC unit (CPU) or power enclosure, secured with a key lock or padlock.
- Access and cabling: Fully removable rear panel, with cables routed neatly through the interior.

BENEFITS:

- Robust construction: Built from thick steel sheet, it delivers outstanding strength and long-lasting performance, even under intensive use.
- Highly customisable: From colour choices and logo integration to a wide range of accessories, the kiosk is designed to be truly unique and tailored to your specific requirements.
- Easy maintenance: The fully removable rear panel provides quick, straightforward access to all integrated equipment, making technical servicing simpler.
