

LMREA

Safe equipment. Smart mobility.

Designer & Manufacturer

CIT - L

The CIT range provides specialist protection for small to mid-sized thermal printers, purpose-built for the demands of the food and drink industry. Its smart design features a hinged front flap in clear PMMA, giving quick, direct access to the printer controls. For effortless servicing, a pull-out shelf on a stainless-steel triple-extension slide lets you fully withdraw the equipment from the enclosure. Closure is secured by a heavy-duty toggle latch that compresses the flap against the seals, ensuring a perfect watertight seal.

Dimensions (mm):

External dimensions: W 385 × D 600 × H 360 mm

Internal dimensions: W 290 × D 570 × H 250 mm

DESCRIPTION:

- **Structure:** 10 mm thermoformed composite shell, through-coloured for enhanced durability.
- **Front access:** Hinged front flap in 6 mm clear PMMA.
- **Cable management:** Fit-and-mount cable glands (for 4 to 15 mm cables).

BENEFITS:

- **Guaranteed protection and sealing:** Thanks to its robust design and IP65 certification (doors closed), your printers are protected from dust and water splashes.
- **Hygienic design:** Smooth walls with no dirt-trap corners actively help prevent condensation and microbial growth—an essential requirement in the food industry.
- **Enhanced ergonomics:** Access to controls and consumables is made as straightforward as possible thanks to the transparent flap and the fully pull-out shelf.

OPTIONS

Label Bin

Make the most of your storage with this compact, hard-wearing label bin.

ECA

Ventilation system providing strong airflow and efficient heat dissipation.

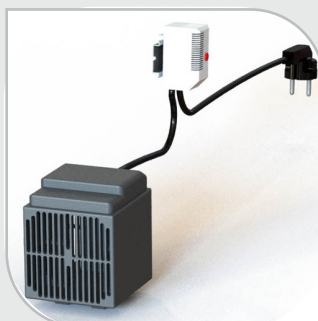

KDL

No-cut cable grommets for routing and organising cables without altering the furniture.

Stainless Steel Base

High-quality stainless-steel base, robust and easy to maintain.

RCA

RCA thermostatically controlled resistance heating to maintain a stable, even temperature.

Stainless Steel Wall Bracket

Stainless-steel wall bracket to secure equipment firmly while freeing up floor space.

PVC Wall Bracket

PVC wall bracket designed for fixing and supporting furniture.

TAV L12 watertight

Hinged flap hatch for easy label retrieval, while protecting them from dust and splashes.

TAV L25 watertight

Hinged flap hatch for easy label retrieval, while protecting them from dust and splashes.

Intermediate shelf

Intermediate shelf integrated into the stainless-steel base.

Light with guide

Dedicated opening for quick, straightforward label removal.
