## HANDHELD SCANNER ENCLOSURE

This enclosure is designed to protect and secure a barcode scanner or any reading device in demanding industrial settings. Its watertight front panel, fitted with either a sealed curtain or a transparent door, provides optimum protection against water, dust, splashes and impacts.

The enclosure features a reinforced opening system (heavy-duty hinges, lockable closure) as well as a dedicated internal space to keep the scanner firmly in a stable position. The transparent front allows a quick check of the equipment's status without opening it.

### Dimensions (mm):

W 220 x D 320 x H 330

(Dimensions can be tailored to your requirements)

### DESCRIPTION:

- Watertight front panel (perimeter seal + airtight closure)
- Choice of opening
- Sealed curtain
- Transparent door mounted on hinges
- Composite housing
- Transparent window (PMMA – clear thermoplastic)
- Wall mounting or integration on a workstation
- Internal retention system for scanner (holder)
- Dimensions adaptable to suit the scanner model
- Secure closure
- Suitable for industrial environments: logistics, food processing, chemical industry, humid or dusty areas

### BENEFITS:

- Watertight front panel to keep water and dust out.
- Enhanced protection that extends the scanner's service life and helps reduce breakdowns.
- Quick access via the sealed curtain or door, with easy handling even when wearing gloves.
- Transparent front for instant visibility of the equipment.
- Sturdy, impact-resistant enclosure with a secure closure.
- Suitable for environments with strict hygiene requirements.
- Flexible installation: wall-mounted or workstation integration.
- Compatible with most handheld scanners and can be tailored to your needs.
- Smooth surfaces and hard-wearing materials for fast cleaning and simpler maintenance.

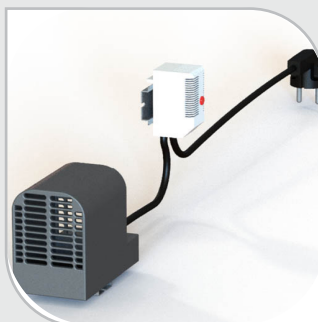

## OPTIONS

### **Cut-out-free cable grommet (KDL)**

Cut-out-free cable grommet for routing and organising cables without altering the furniture.

### **Heating (RCA thermostatically controlled element)**

RCA thermostatically controlled heating element helps maintain a stable, even temperature.

### **Badge reader bracket**

Dedicated bracket for mounting the badge reader.
