MU3 INOX 304L

The MU 3 INOX enclosure provides complete, watertight protection, purpose-built for demanding settings such as the food and drink industry. Made entirely from 304 stainless steel, it is split into three separate compartments to house a full computer workstation: LCD screen, system unit, printer, keyboard and mouse. Access to the screen and system unit is via a front door secured with a transparent Lexan panel. The other compartments, for the printer and keyboard, are reached through drop-down flaps and fitted with pull-out shelves for easy handling.

Dimensions (in mm):

Overall external dimensions: 605 x 600 x 1160

Usable internal dimensions (Screen + CPU): 600 x 575 x 480

Usable internal dimensions (Printer): 510 x 575 x 415

Usable internal dimensions (Keyboard): 510 x 575 x 75

DESCRIPTION:

- **Material:** Fully sealed enclosure in 304 stainless steel.
- **Access and visibility:** Screen/CPU compartment: Front door with a 6 mm-thick transparent Lexan panel.
- **Keyboard compartment:** Stainless-steel drop-down flap with a pull-out PVC shelf.
- **Pull-out shelves:**
- **Printer:** Shelf on triple-extension stainless-steel runners, rated to 60 kg.
- **Keyboard and mouse:** Pull-out PVC shelf.
- **Integrated connectivity:**

BENEFITS:

- **Maximum hygiene and durability:** The 304 stainless-steel construction delivers outstanding strength and is easy to clean—ideal for sensitive environments.
- **Enhanced watertight sealing:** Each compartment is secured with compression latches that press the flaps against sealing gaskets, ensuring optimal protection.
- **Ergonomics and heavy-load capacity:** The pull-out printer shelf, mounted on a stainless-steel triple-extension slide, supports loads of up to 60 kg, allowing full, safe access to the equipment.
- **Streamlined organisation:** The vertical, compartmentalised design brings the entire workstation together in one place, making the most of your working space.

Designer & Manufacturer

OPTIONS

Stainless steel base

High-quality stainless steel base—durable and easy to maintain.

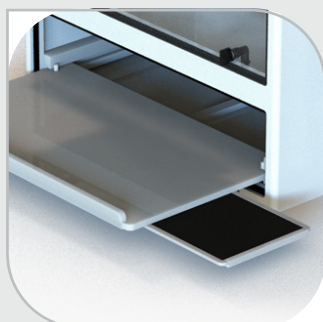

Stainless Steel Wall Mount

Stainless-steel wall bracket for securely mounting equipment while keeping floor space clear.

KDL

No-cut cable grommet for neat cable routing without altering the furniture.

Mouse shelf

Pull-out mouse shelf providing a dedicated space for comfortable mouse use.

Watertight TAV L12

Hinged flap access panel for easy label retrieval, while shielding them from dust and splashes.

**TAV L25
watertight**

Hinged flap access panel for easy label retrieval, while shielding them from dust and splashes.

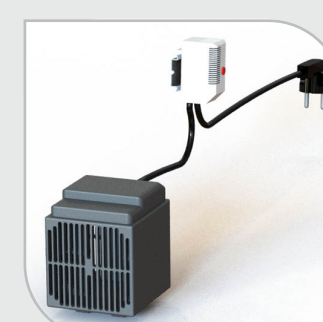

4 swivel castors (2 braked)

Heavy-duty castors designed to make equipment easier to move.

ECA

Ventilation system that promotes good airflow and efficient heat dissipation.

RCA 150w

RCA thermostatically controlled resistance heating to maintain a stable, even temperature.
