Fixed Aluminium Workstation alu

The fixed aluminium workstation is a sturdy, ergonomic solution for integrating a complete computer setup, equally suited to industrial environments and technical areas. Its 1.70 m anodised aluminium column, with multiple integrated channels, allows a bespoke configuration of accessories and peripherals for optimised, scalable use.

DESCRIPTION:

- Structure: 1.70 m anodised aluminium column with integrated channels (2 or 4 sides depending on model).
- Shelves: compact laminate, with aluminium frame and locking system.
- Mounting: wall-mounted or floor-mounted, with 4 anchor points depending on the version.
- Dimensions: 1.70 m column, adaptable to the chosen configuration.
- Protection & finish: on both sides of the column, a cable duct is provided for cable routing and a cleaner look.

BENEFITS:

- Continuously adjustable shelf and equipment height along the entire column, delivering ideal ergonomics whatever the user's build or operating constraints.
- Compact laminate shelves reinforced with an aluminium frame, providing stability and durability for intensive use.
- Modular design allowing the addition of monitor mounts, a system unit and other accessories to suit the workstation's requirements.
