

Safe equipment. Smart mobility.

LMREA

Designer & Manufacturer

VARMİ

The VARMI cabinet is designed for the safe, tidy storage of small equipment. Tough, configurable and built to withstand demanding conditions, it offers outstanding set-up flexibility thanks to a wide range of customisation options. Ideal for industrial, technical and logistics settings, it delivers everyday protection, clear visibility and efficient access.

Dimensions (mm):

External dimensions: W 1000 × D 300 × H 2000 mm

Internal dimensions:

Right-hand side: W 470 × D 230 × H 1870 mm

Left-hand side: W 470 × D 230 × H 1870 mm

DESCRIPTION:

- Available in:
 - Black – 100% recycled PVC / White – PVC
- Door options:
 - Opaque PVC / 10 mm transparent PMMA for a quick visual check of the contents
- High resistance:
 - Moisture / Dust / External impacts
- Doors close against an EPDM foam gasket, ensuring a perfect seal
- Optional lock to secure the doors
- Main ventilation with flap filter
- Heat dissipation
- Prevents fine particles from entering

BENEFITS:

- Robust construction in PVC or PMMA
- Fully modular (dimensions, shelves, cabling, doors)
- Maximum protection for equipment
- Designed for demanding industrial environments
- Durable materials

OPTIONS

Castors (depending on dimensions)

Heavy-duty castors designed to make equipment easy to move.

ECA

Ventilation system providing good air circulation and efficient heat dissipation.

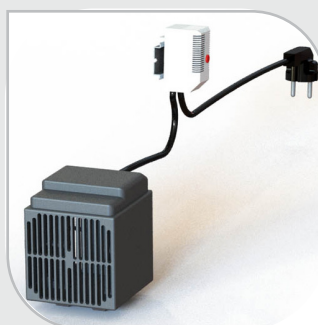

Thermostatically Controlled ECA

Ventilation system providing good air circulation and efficient heat dissipation.

Internal shelf (adjustable, quantity as required)

Height-adjustable internal shelf, available in the quantity of your choice.

RCA 150W

RCA thermostatically controlled resistance heater, designed to maintain a stable, even temperature.
