Safe equipment. Smart mobility.

## INSTRUCTIONS BEFORE USE

### INSTALLATION OF LITHIUM ENERGY ENCLOSURES V2

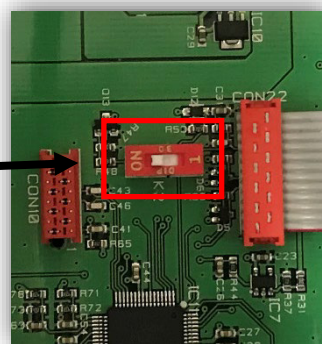

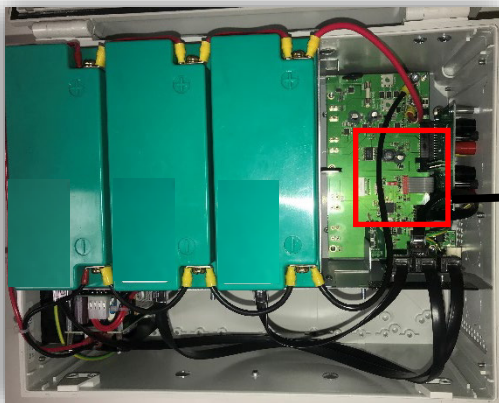

*Before starting any work, ensure the energy enclosure is de-energised. Warning! The enclosure contains low voltage (230V AC). B1 or H1 authorisation is required to commission the enclosure.*

**On receipt of the enclosure:**

1. Use the supplied key to open the energy enclosure

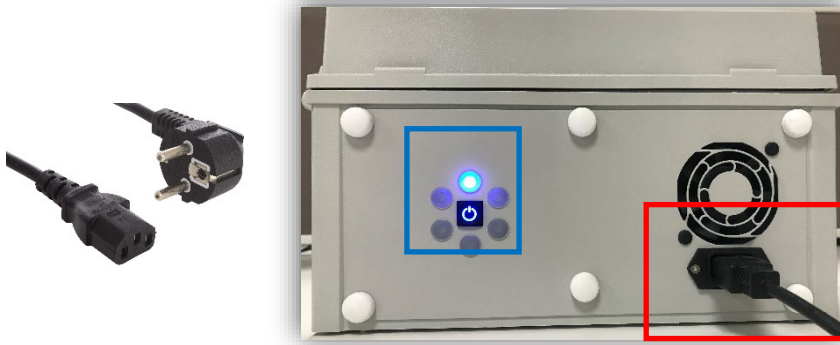

2. Press the switch to set it to the ON position

3. Close the enclosure (using the supplied key)

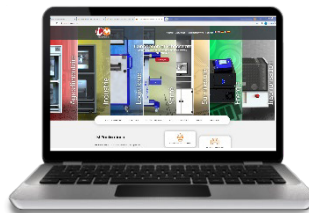

4. Charge the unit by connecting the supplied cable (all LEDs turn blue once the unit is fully charged)

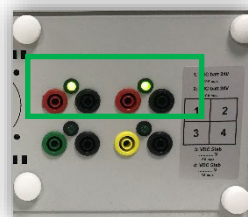

5. Once fully charged, unplug the unit

6. Connect the computer equipment to 220V and/or 24V

7. Press ON/OFF to turn the unit on (the output LEDs light up green)

**OPTION: REMOTE DISPLAY**

**Set-up complete.**
