

Agro PM – GM

Range of AGRO Protective Roller-Shutter Enclosures (PM / GM)

The AGRO roller-shutter enclosure range is an innovative protection solution specifically designed to meet the demanding requirements of the food-processing industry. Intended to house a complete computer workstation, it is available in two sizes: **AGRO PM (Small Model)** and **AGRO GM (Large Model)**. The GM version offers increased internal space to accommodate additional equipment such as a weighing indicator.

Both enclosures ensure **IP65 sealing**, thanks to a robust 19 mm extruded composite structure with smooth panels and no retention angles, guaranteeing impeccable hygiene. Their key feature is the articulated slat **roller-shutter system**, which replaces a traditional door to optimise ergonomics and floor space.

Key features

- **GUARANTEED protection and sealing (IP65):** Designed to withstand the harshest environments, they provide reliable protection against dust and water jets.
- **Optimised workspace:** The roller-shutter system offers full access without the swing radius of a door — ideal for confined spaces.
- **Fully modular internal layout:** The interior can be fitted with fixed or pull-out shelves, adjustable in height to perfectly match your equipment.
- **Simplified maintenance:** The rear panel is fully removable and sliding, offering quick and easy access to the back of the equipment and all connections.

Specifications

- **Structure:** 19 mm extruded composite panels.
- **Access:** Articulated thermoplastic roller-shutter door.
- **Layout:** Pull-out polyethylene keyboard shelf and removable/sliding rear panel.
- **Connectivity:** Standard cable glands suitable for cables from 4 to 15 mm.

Options and Variants

- Stainless steel floor stand or wall-mount bracket.
- Set of 4 wheels for the stand (including 2 with brakes).
- Additional fixed or pull-out shelves (for printer, mouse, etc.).
- Ventilation system (ECA) with IP65 deflector, or heating system (RCA thermostatic heater).
- IP65 inspection window, access hatch, lock, and monitor support.
- Cut-out-free cable entry system (KDL).
