

Protective Cover

The **protective cover** extends the lifespan of equipment by covering it after use, preventing exposure to external hazards such as water or dust. Its fabric is both **waterproof and breathable**, providing effective protection without promoting condensation. Custom-made, it fits your devices precisely based on measured dimensions and can also complement the protection of computer workstations, enclosures, or carts.

The **LMREA protective cover** is a simple and cost-effective solution to sustainably safeguard your equipment in all industrial environments.

Key Strengths

1. Effectively protects against liquid splashes, dust, and humidity.
2. Reduces wear on devices and minimizes the need for cleaning before reuse.
3. Quick and easy installation after each use.
4. Durable materials suitable for heavy-duty industrial use: waterproof, breathable, and abrasion-resistant fabric.
5. Compatible with all LMREA products (enclosures, carts, etc.) for complete equipment protection.

Options and Variants

- **Accessory compatibility:** Can include openings or be complemented with specific modules (enclosure, cart).
- **Customization:** Choice of color, addition of logo, or industrial marking on request.
- **Technical fabric range:** Reinforced versions available, including UV-resistant, fire-retardant, antistatic, or food-grade fabrics, depending on sector requirements.
