

General Description

The VARMI cabinet is designed for the secure and organized storage of small equipment. Robust, modular, and resistant to demanding environments, it offers great configuration flexibility thanks to its many customization options. Suitable for industrial, technical, and logistics environments, it ensures protection, visibility, and everyday efficiency.

Key Features

Structure & Materials

- Available in:
 - **Black – 100% recycled PVC**
 - **White – PVC**
- Door options
 - **Opaque en PVC**
 - **Transparent 10 mm PMMA for quick inception of contents**
- High resistance :
 - To humidity
 - To dust
 - To external impacts

Modularity & Configuration
